Cipla
RESPIRATORY[®]

"Tropicana", Hotel Gateway (Taj), Akota, Vadodara.

Pneumonia – 'the Captain of the men of death'. Worldwide a leading cause of mortality, this dis-ease has been known since the earliest records of medicine and is one of the oldest diseases to have a specific diagnosis and name.

From subtle presentations to catastrophic manifestations, from isolated cases to epidemic proportions, pneumonia has confused clinicians, delighted radiologists and often been the nemesis of microbiologists. Its management has posed a real challenge. Baroda

Chest Group endeavors to gain more insight into the complex world of chest infections by organizing a symposium on 21 March 2010. A mix faculty consisting of chest physicians, radiologist, microbiologist and infectious disease specialists will aim for a multi-disciplinary approach to this topic.

Invited guests are Dr Rajeev Soman MD – Infectious Disease specialist, P D Hinduja National Hospital, Mumbai, Dr Anjali Shetty MRCP, FRCPath consultant microbiologist, P D Hinduja National Hospital, Mumbai and Dr Atul Patel MD – Infectious Disease specialist, Vedanta Hospital, Ahmedabad.

Baroda Chest Group (BCG) – a group of 25 members sharing a common interest in all – things - respiratory, have been meeting regularly for academic discussions. In addition, as part of its' efforts in sharing knowledge in the field of respiratory medicine, it holds 3 annual meetings inviting colleagues including post graduates. Close on the heels of a successful CME on Pleural Diseases, we now extend our warm welcome for your active participation in this meeting and for all our future programmes (the next one being Lung Pathology for the Clinician in end of June)

“ This meeting is free but it would be helpful if you confirm your participation by texting "Yes" to 9879519889 or e-mailing to pateldbp@gmail.com by 18 March.”

*Dr Dharmesh Patel
on behalf of Baroda Chest Group*
